Notice of Determination of Eligibility for Categorical Exclusion

Cuttingsville Fire District No. 1, WSID #5241  
Water System Improvements  
DWSRF Project Number RF3-190

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Vermont/EPA Revolving Loan Fund Program, Cuttingsville Fire District No. 1, WSID #5241, has requested its proposed water improvement project be evaluated for eligibility for a Categorical Exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

The project consists of replacement of the existing chlorination and well control building. The project is confined to the fence line of an existing water storage facility.

Our consideration of the Cuttingsville Fire District No. 1 request included reviewing environmental information and documentation completed and submitted by their consultant, Otter Creek Engineering, Inc. Upon completion of this independent evaluation, the Department has determined the project is eligible to receive a categorical exclusion as the proposed action consists of the replacement of existing water supply facilities. The project will correct water system deficiencies and does not meet any of the criteria to deny the categorical exclusion request.

Further information on the project and this determination are available for inspection at the Department of Environmental Conservation, Water Supply Division, Old Pantry Building, at 103 South Main Street, Waterbury, Vermont.
