Notice of Determination of Eligibility for Categorical Exclusion

Town of Proctor, WSID #5228
Water System Improvements
Field Street Well Rehabilitation

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Vermont/EPA Revolving Loan Fund Program, the Town of Proctor has requested its proposed water improvement project be evaluated for eligibility for a Categorical Exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

The proposed project includes replacement of the well pump station to house the original well and the larger replacement well casing. The project also includes addition of an emergency generator and site modifications to improve access and drainage.

Our consideration of the Town of Proctor request included reviewing an Environmental Information Document dated September 2010 prepared by Marble Valley Engineering, PC and numerous supporting documents. At the completion of this independent evaluation, the Department has determined the project meets the criteria for receiving a Categorical Exclusion.

Further information on the project and this determination are available for inspection at the Department of Environmental Conservation, Water Supply Division, Old Pantry Building, at 103 South Main Street, Waterbury, Vermont. In addition to the applicant, a copy of this determination will be sent to a list of stakeholders and posted on the Water Supply Division's website.
