Notice of Determination of Eligibility for Categorical Exclusion

Town of Randolph, WSID #5179  
Water System Improvements

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Vermont/EPA Revolving Loan Fund Program, Town of Randolph Water System WSID #5179 has requested its proposed water improvement project be evaluated for eligibility for a Categorical Exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

The proposed upgrade includes installation of approximately 7,500 linear feet of 8" water line along VT Route 66, Windover Road, and Harlow Hill Road. The project also includes the construction of a new booster pump station located on Harlow Hill Road near the intersection of VT Route 66.

Our consideration of the Town of Randolph request included reviewing the Environmental Information Document and supporting documentation dated November 2008, which was completed and submitted by Forcier Aldrich & Associates. At the completion of this independent evaluation, the Department has determined the project meets the criteria for receiving a Categorical Exclusion. The project will correct water system deficiencies and does not meet any of the criteria resulting in denial of an exclusion.

Further information on the project and this determination are available for inspection at the Department of Environmental Conservation, Water Supply Division, Old Pantry Building, at 103 South Main Street, Waterbury, Vermont. In addition to the applicant, a copy of this determination will be sent to a list of stakeholders and posted on the Water Supply Division's website.
