Notice of Determination of Eligibility for Categorical Exclusion

South Burlington Fire District No. 1, WSID #5090
Water System Improvements
DWSRF Project Number AR3-033

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Vermont/EPA Revolving Loan Fund Program, South Burlington Fire District No. 1 Water System WSID #5090 has requested its proposed water improvement project be evaluated for eligibility for a Categorical Exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

The proposed upgrade includes upgrading piping to an existing buried concrete water storage tank that will disconnect tank drain and overflow that is currently below grade. The drain and overflow lines from the tank will be disconnected from the tank perimeter drain, will have appropriate valves installed and brought above grade to daylight in the drainage swale at the base of the slope.

Our consideration of the South Burlington Fire District No. 1 request included reviewing the Environmental Information Document, dated June 2009, which was completed and submitted by Vermont Rural Water Association. At the completion of this independent evaluation, the Department has determined the project meets the criteria for receiving a Categorical Exclusion. The project will correct water system deficiencies and does not meet any of the criteria resulting in denial of an exclusion.

Further information on the project and this determination are available for inspection at the Department of Environmental Conservation, Water Supply Division, Old Pantry Building, at 103 South Main Street, Waterbury, Vermont. In addition to the applicant, a copy of this determination will be sent to a list of stakeholders and posted on the Water Supply Division's website.
