Determination of Eligibility for Categorical Exclusion

Town of Troy-Troy Water System, WSID #5206  
Water System Improvements  
DWSRF Project AR3-005

CAT-  
EX

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Vermont/EPA Revolving Loan Fund Program, Troy Water System, WSID #5206, has requested its proposed water improvement project be evaluated for eligibility for a Categorical Exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

The quick start portion of the project to be funded under the American Recovery and Reinvestment Act (ARRA) includes: water treatment for arsenic and manganese removal and water meters.

Our consideration of the Troy Water System request included reviewing environmental information and documentation completed and submitted by Leach Engineering Consultants, PA. Upon completion of this independent evaluation, the Department has determined the project meets the criteria for receiving a Categorical Exclusion. The project will correct water system deficiencies and does not meet any of the criteria resulting in denial of an exclusion.

Further information on the project and this determination are available for inspection at the Department of Environmental Conservation, Water Supply Division, Old Pantry Building, at 103 South Main Street, Waterbury, Vermont.
