
Vermont Agency of Natural Resources Process Source
2009 Air Pollutant Emissions Inventory For Criteria Pollutants

The information requested below will allow the Agency to estimate your actual annual air contaminant emissions. Please duplicate this blank form and then provide the information requested for calendar year 2009. Use a single form for each process-type source of air pollution at your facility. In following years, if your emissions are greater than 5 tons annually, your facility will continue to receive these forms with information from the prior year displayed on them.

If you have questions, or desire assistance with completing the inventory, please call Dan Riley at (802)-241-3858.

Facility Name :

Person Completing Inventory :

Source Description :

Operational Data :

HoursPerDay :

Winter Throughput (%) :

DaysPerWeek :

Spring Throughput (%) :

WeeksPerYear :

Summer Throughput (%) :

HoursPerYear :

Autumn Throughput (%) :

(Over)

Process Source (continued)

Raw Materials Input*:

Type

Quantity

| Type | Quantity |

*Information in this section only necessary if accurate figures for stack flow rate and hours of operation cannot be supplied.

Stack Parameters :

Stack Number :

Stack/Duct Discharge Height (Feet) :

Stack/Duct Inner Diameter at Exit (Inches) :

Exit Gas Temperature (Deg F) :

Flow Rate at Exit (Actual FT³/Min) :

If there is an air pollution control device on this source inspect the following information and correct if necessary :

TSP Control Device:

Theoretical Efficiency (%) :

If an estimated emission rate exists, supply the information below.

Estimated Emission Rate* :

Basis of Estimate :

* If test data 4 years old or less is available.
