**Re: Authorization to Discharge under General Permit 3-9030
Notice of Intent No. 6275-9030**

Dear Mr. Palmer:

The Stormwater Management Program hereby approves the Engineering Feasibility Analysis (EFA) Report (dated 3/31/2011) for the Business Park North development, located at 20 Kimball Avenue in South Burlington, discharging to Potash Brook. The EFA Report prepared by Llewellyn – Howley, Inc. specified that site limitations consistent with Appendix A, Table 2 of General Permit 3-9030, preclude the implementation of additional Best Management Practices (BMPs) at this site. Therefore, because additional BMPs are not proposed for installation under the EFA, no further follow up action specific to the EFA is required by the permittee under Subpart IV.A. of General Permit 3-9030.

The approved analysis will be posted on the Department's website for public access and review. The analysis will remain on the website for a period of fifteen (15) days.

Please also note that your authorization to discharge treated stormwater runoff under General Permit 3-9030 includes inspection, maintenance, and annual reporting requirements. Please read the permit and the previously issued authorization carefully. If you have any questions, please contact Kevin Burke at (802) 338-4839.

Sincerely,

Padraic Monks
Stormwater Program Manager
Water Quality Division
