**Municipal Pollution Control Projects Priority List for State FY 2009 and
Clean Water Intended Use Plan for Federal FY 2008****Municipalities and Interested Parties:**

On, October 17, 2008, the Department notified municipalities and other interested parties of the availability of the Draft Municipal Pollution Control Projects Priority List for state Fiscal Year 2009 and the Draft Clean Water Intended Use Plan for federal Fiscal Year 2008 for review and comment, and of the public hearing held on November 14, 2008. The public comment period was opened until November 24, 2008. A Public Responsiveness Summary has been prepared to address the oral and written comments received by the Department at the public hearing and through the comment period. The Public Responsiveness Summary is attached.

Pursuant to the authority provided in the State of Vermont Municipal Pollution Control Priority System, the Department of Environmental Conservation has adopted the priority list as it appears on the following sheets. The *FY 2009 Pollution Control Projects Priority List* indicates those projects the Department anticipates will be receiving state and/or federal funding through the end of state Fiscal Year 2009 and until the FY 2010 list is adopted. The 2008 Clean Water Intended Use Plan, which sets forth how the federal Fiscal Year 2008 Clean Water Capitalization Grant for the Clean Water State Revolving Fund (CWSRF) will be used, is attached to the Priority List, as are the Department lists of projects anticipated to be funded during Fiscal Years 2010 through 2013. These listings present those projects potentially fundable from grant programs or the revolving loan program over the next five state fiscal years, and are based on anticipated federal and state appropriations.

If you have any questions or desire clarification of any of the content of these documents, please contact Winslow Ladue (802-241-3404) at the Facilities Engineering Division.

Sincerely,

Laura Q. Pelosi
Commissioner

**VERMONT AGENCY OF NATURAL RESOURCES
DEPARTMENT OF ENVIRONMENTAL CONSERVATION**

State FY 2009 Municipal Pollution Control Project Priority List
and Federal FY 2008 Clean Water Intended Use Plan

General Information

1. Project priority points awarded in accordance with the Department's Municipal Pollution Control Priority System are listed in the far-right column of the FY 2009 Pollution Control Project Priority List.
2. Priority points on the Planning List or 'P-List' for future years do indicate the priority in which construction projects will be funded. Whether all construction projects ready to proceed in a particular year will be funded depends on the amount of funds allocated to the program by the Vermont legislature and through the federal capitalization grant for the Clean Water State/EPA Revolving Loan Fund (CWSRF). Planning projects are not funded in order of their priority, but rather at a rate necessary to bring sufficient projects to the implementation phase to use all of the anticipated grant and loan funds each year.
3. The Clean and Clear Initiative calls for the accelerated funding of Phosphorus Removal Projects at wastewater treatment plants which are identified as requiring reduced phosphorus discharge limits in the Lake Champlain Phosphorus TMDL Report. Funds have been provided for this purpose in the 2005 through 2009 Capital Bills.
4. Appearance of projects on the Project Priority List indicates eligibility for funding assuming all other requirements are met. The dollar amounts may change from those listed as project cost changes affect the pro-rating of available grant amounts.
5. The Discharge Permits for all municipal wastewater facilities were reviewed for requirements which might result in infrastructure projects over the next five years, and these were included on the appropriate year Project List.

PRELIMINARY AND FINAL DESIGN ENGINEERING PLANNING LIST ABBREVIATIONS AND NOTATIONS

The Planning Projects List uses abbreviations to identify project types. These abbreviations are listed, defined and described below.

“REF” stands for **refurbishment**. When a facility’s NPDES permit is renewed for the five year period within which its twentieth year of operation falls, the permit includes a requirement to perform an evaluation of the facility to identify the improvements and renovations that are necessary to enable the facility to continue to operate efficiently and meet its discharge standards for another twenty to twenty-five year design period.

“CSO” stands for **combined sewer overflow** abatement projects. Combined sewers carry both wastewater and stormwater and become hydraulically overloaded during rainfall events. This results in overflows to surface waters that are in violation of state and federal standards.

“PHOS” stands for **phosphorus** removal projects. State statute prohibits most discharges to the drainage basins of Lake Champlain and Lake Memphremagog that contain a phosphorus concentration in excess of 0.8 milligrams per liter on a monthly-average basis, and requires that phosphorus effluent limits be implemented in any drainage basin where needed to meet the requirements of a total maximum load document or attain compliance with water quality standards.

“DWF” represents **dry weather flow** projects. These are projects which abate pollution that occurs during dry weather periods, when systems are not stressed by rainfall events (see CSO discussion). Examples are the construction of a collection system and new treatment facility to eliminate direct discharges to surface waters, or the extension of a sewerage system to collect the flows from failing septic tank or leach field systems and convey them to an existing treatment facility.

“ENL” stands for **enlargement** of current facilities to handle increased wastewater flows resulting from municipal growth. These projects receive relatively low priority.

“OTH” stands for **other**, and represents projects that do not neatly fit into the primary categories.

VERMONT

CLEAN WATER INTENDED USE PLAN

FEDERAL FISCAL YEAR 2008 FUNDS

A. Introduction

Vermont has agreed to submit to the U.S. Environmental Protection Agency, as part of its annual application for a Clean Water Capitalization Grant under Title VI of the Water Quality Act of 1987, (the Act), a Clean Water Intended Use Plan (CWIUP) which meets requirements of Section 606(c) of the Act and the Clean Water Capitalization Grant Agreement. The CWIUP serves as the planning document to explain how each fiscal year's appropriation for the Clean Water State Revolving Fund (CWSRF) will be used.

B. Short Term Goals and Objectives

Vermont holds the following short term goals and objectives for use of the CWSRF.

- (1) To coordinate NPDES permit schedules with anticipated award of CWSRF loans such that projects are brought into preliminary and final planning in time to assure their readiness to proceed to construction when capitalization grant funds become available.
- (2) To develop any rules, guidance or procedures necessary to implement the Vermont - EPA pollution control revolving fund.
- (3) To provide local government with low cost financial assistance.
- (4) To coordinate state funded programs for wastewater treatment facilities with activities of the CWSRF.
- (5) To provide effective program management to insure integrity of the CWSRF.

C. Long Term Goals and Objectives

The primary long term goal of the CWSRF is to provide financial assistance to Vermont municipalities to fund the completion of all known enforceable requirements of the Act. The second long term goal of the CWSRF is to insure the fund operates in perpetuity to

provide continuing financial assistance to Vermont municipalities for future pollution control needs to include new wastewater treatment facility construction, existing facility enlargement or refurbishment, sewer extensions, combined sewer overflow abatement, sludge and septage treatment and disposal, stormwater management facilities, advanced waste treatment determined necessary to meet water quality standards, and other projects deemed necessary for pollution control.

Combined sewer overflow abatement projects presently receive a CWSRF loan in the amount of 50% of the total eligible project cost, and a 25% construction grant from state funds. The remaining 25% of project funds comes from local bond issues. Certain sludge and septage treatment and disposal projects presently qualify for a mix of 50% CWSRF loan and 50% state grant on eligible project cost. If, in the future, sufficient state capital funds cannot be secured to provide the grants, it may become necessary to fund CSO and sludge and septage projects with a loan on the total project in order to assure the most beneficial use of the federal loan funds.

Other eligible projects will receive CWSRF loans on 100% of eligible project cost. Such eligible projects include: sewer extensions, facility enlargement and refurbishment, and sludge and septage treatment improvements and disposal that do not qualify for state grant funding. State grants may still be awarded to projects that insure other public benefit by using federal matching funds which would otherwise be lost to the state's overall pollution control program.

Although the CWSRF may be used for the refinancing of local debt obligations incurred after March 7, 1985, Vermont does not intend to use the fund in this way until all necessary pollution control projects have been constructed, unless there is compelling public benefit to be secured. The interest rate on CWSRF loans issued to refinance debt has been set at eighty percent of the average rate on marketable obligations of the state. All other CWSRF loans are currently issued at zero percent interest. An administrative fee of up to two percent on construction loans took effect on July 1, 1999. The fee is charged for all new construction loans, with the exception of CSO projects and those projects which the state has made a previous commitment to fund with no interest or fee. Fee proceeds will be deposited into a dedicated account separate from the CWSRF account, referred to as the administrative account. In the future, if funds held in the administrative account are in excess of that necessary to fund the state's administration of the CWSRF program, some of those funds may be transferred to the CWSRF account for project funding.

D. CWSRF Capitalization Grants for Federal Fiscal Year 2008 and Future Years

The federal fiscal year 2008 capitalization grant allotment available to Vermont is \$3,274,300, as authorized by Title VI of the Clean Water Act. We will apply for the grant on a schedule as determined appropriate following the SFY 2009 Priority List Hearing. For planning purposes, we are projecting future capitalization grants at \$5 million. Pollution Control Project Planning Lists (P-list) show anticipated construction and planning projects for the immediate five-year period inclusive of state fiscal year 2009.

E. Criteria and Methods for Distribution of Funds

The Vermont CWSRF initiated operations in FY89 and all initial financial assistance activities of the CWSRF have been in the form of loans. Loans will continue to be made in accordance with a project's priority list ranking (noted on the Priority List) established annually through the Municipal Pollution Control Priority System.

The Vermont General Assembly enacted Act 75 creating 24 V.S.A. Chapter 120 in the 1987 session, which act established Vermont's Clean Water Revolving Fund and set out certain priority criteria for the purpose of ranking prospective projects. The Municipal Pollution Control Priority System incorporates those criteria in addition to criteria required in federal construction grant regulations 40 CFR Section 35.915.

F. Use of Funds for Non-Point Source Projects

In Fiscal Year 2004 Vermont issued a \$150,000 loan to a municipality to fund a municipal loan program for the replacement of individual septic systems. In FY 2009 this municipality is anticipated to receive another loan to finance this program

In Fiscal Year 2009 Vermont intends to make \$500,000 of Fund money available to individual septic system owners for the replacement of failed septic systems. The Agency of Natural Resources will develop and administer this program.

G. Re-allocated or Additional Federal Economic Stimulus Funds

In the event funds are re-allocated from the DWSRF to the CWSRF or additional federal funds are made available beyond the anticipated amount, Vermont will advance these funds to the appropriate projects in accordance with this Intended Use Plan, the Municipal Pollution Control Priority System, and any specific requirements of the re-allocated funds.

H. Public Participation

Vermont implements public participation procedures described in 40 CFR Part 25 during development of the annual Pollution Control Priority List (PPL) and CWIUP. The CWIUP is developed and adopted annually along with the PPL using the same public participation procedure employed for adoption of the PPL. That procedure is outlined in the *Municipal Pollution Control Priority System*.

Vermont implements public participation relating to project-specific environmental review for CWSRF funded projects in accordance with the department's *Environmental Review*

Procedures For Projects Funded Through the Vermont/EPA Revolving Loan Program. This procedure was approved by the EPA Regional Administrator in accordance with the August 2, 1989 CWSRF Operating Agreement between the State of Vermont and the U.S. Environmental Protection Agency, Region I.

I. Annual Report

In accordance with the requirements of Section 606(d) of the Act, Vermont will provide EPA with an Annual Report, which will be submitted to EPA within 90 days of the end of the state fiscal year. The Annual Report will contain information on how the state has met the goals and objectives of the previous fiscal year as stated in the IUP and grant agreement. The Annual Report will describe how well the existing SRF financial operating policies, alone or in combination with other state financial assistance programs, will provide for the long term fiscal health of the fund, assist communities to increase local responsibility for compliance, and carry out other provisions specified in the State Clean Water Strategy. The Annual Report will also provide information on loan recipients, loan awards/disbursements, and environmental assessment determinations.

The Annual Report will also establish that the State has:

- (1) Reviewed all CWSRF funded section 212 projects in accordance with the approved environmental review procedures (section 602(a));
- (2) Deposited its match on or before the date on which each quarterly grant payment was made (section 602(b)(2));
- (3) Made binding commitments to provide assistance equal to 120 percent of the amount of each grant payment within one year after receiving the grant payment (section 602(b)(3)); and
- (4) Expended all funds in an expeditious and timely manner (section 206(b)(4)).

J. Environmental Benefits Reporting

A Clean Water State Revolving Fund Environmental Benefits Assessment Form will be completed each time a loan is transacted during the fiscal year. A compilation of all Environmental Benefits Assessment Forms completed during the fiscal year will be included in the Annual Report.

K. **Project Funding**

Projects/Activities Anticipated to Receive Federal FY2008 CWSRF Funds*
(Award of FFY2008 Funds are anticipated to be made during SFY09)

Loan Recipient	Project Description	Total Project Cost	SRF Loan	Federal Share FFY 2008 Funds
City of St Albans	Sludge Dewatering & Plant Rehabilitation	4,000,000	3,679,210**	3,066,008
Vermont SMRF	Administrative Expense	500,000	-	208,292
Total		<u>4,500,000</u>	<u>3,679,210</u>	<u>3,274,300</u>

* Costs will change as projects are refined

**VERMONT AGENCY OF NATURAL RESOURCES
DEPARTMENT OF ENVIRONMENTAL CONSERVATION**
State FY 2009 Municipal Pollution Control Project Priority List
and Federal FY 2008 Clean Water Intended Use Plan

Hearing and Public Responsiveness Summary

Hearing

A public hearing to receive comment on the state *FY 2009 Municipal Pollution Control Projects Priority List and the federal FY 2008 Clean Water Intended Use Plan* prior to adoption was convened at approximately 2:00 pm on Friday November, 14, 2008. The hearing was held in the Skylight Conference Room at the state office complex in Waterbury, Vermont. Notice of the meeting was sent to those municipalities, organizations, and individuals appearing on the mailing list maintained for this purpose, and was published in the Rutland Herald and the Barre Montpelier Times Argus, and the Burlington Free Press during the week of October 20. Winslow Ladue of the Facilities Engineering Division moderated the meeting. Representatives of two consulting engineering companies, USDA Rural Development, Vermont Rural Water Association, and Vermont Bond Band, and three Department staff member attended the hearing.

It was noted that the hearing was being taped to assist in the preparation of the responsiveness summary, and that any verbal or written comments received through November 24 would be considered in the preparation of the final documents.

Comments	Responses
What impact will one large project in South Burlington have on the State Revolving Fund?	The impact on future project would depend in part on the level federal funding, the rate of repayments, and the size and number future projects. One possibility is that project funding may be based on the priority points. The fund can currently support this project as well as others.
Colchester Fire District #2 project cost will likely increase from 4.4 million to 14 million dollars.	So noted
What is the current status of the Federal Stimulus bill?	It is too early to tell and the likelihood of a stimulus funding package appears to be growing. The Department is in the process of preparing for this possibility by putting together list of potential projects and exploring possible changes that might expedite the process.
Will the change in Agency Secretary have a change on the administration of the State Revolving Fund?	We do not expect a change in the near future.

Can the timing and format of future meetings be changed?	Yes, next year, as requested we will try to: hold the meeting on a Tuesday, Wednesday, or Thursday; provide an option for people to call in to participate; and we will look into using Vermont Interactive Television.
Please include the revisions provided for projects planned for Brighton, Colchester FD #2, Enosburg Falls, Hinesburg, Morrisville, Pownal, Proctor, Randolph, and St Albans City.	See changes included in the lists reflecting the requests. Note that in some cases the Facilities Engineering Division has included addition information where it helps clarify a project.
Please include the revisions provided for projects in the Town of Springfield.	See changes included in the lists reflecting the requests.
