Municipal Pollution Control Projects Priority List for State FY 2011 and
Clean Water Intended Use Plan for Federal FY 2010

Municipalities and Interested Parties:

On, February 5, 2010, the Department notified municipalities and other interested parties of the availability of the Draft Municipal Pollution Control Projects Priority List for state Fiscal Year 2011 and the Draft Clean Water Intended Use Plan for federal Fiscal Year 2010 for review and comment, and of the public hearing held on March 23, 2010. The public comment period was open through April 2, 2010. A Public Responsiveness Summary has been prepared to address the oral and written comments received by the Department at the public hearing and through the comment period. The Public Responsiveness Summary is attached.

Pursuant to the authority provided in the State of Vermont Municipal Pollution Control Priority System, the Department of Environmental Conservation has adopted the priority list as it appears on the following sheets. The Municipal Pollution Control Projects Priority List for State Fiscal Year 2011 indicates those projects the Department anticipates will be receiving state and/or federal funding through the end of state Fiscal Year 2011 and until the FY 2012 list is adopted. The sheets also includes (right portion) the Planning List which shows projects anticipated to be funded during Fiscal Years 2012 through 2015. These listings present those projects potentially funded from grant programs or the revolving loan program over the next five state fiscal years, and are based on anticipated federal and state appropriations.

If you have any questions or desire clarification of any of the content of these documents, please contact Winslow Ladue (802-241-3404) at the Facilities Engineering Division.

Sincerely,

Justin G. Johnson, Commissioner
Department of Environmental Conservation

**VERMONT AGENCY OF NATURAL RESOURCES
DEPARTMENT OF ENVIRONMENTAL CONSERVATION**

State FY 2011 Municipal Pollution Control Project Priority List
and Federal FY 2010 Clean Water Intended Use Plan

General Information

1. Project priority points awarded in accordance with the Department's Municipal Pollution Control Priority System are listed in the FY 2011 Pollution Control Project Priority List.
2. Priority points are assigned to projects on the Planning List when these projects are proposed for the priority list. Whether all construction projects ready to proceed in a particular year will be funded depends on the amount of funds allocated to the program by the Vermont legislature and through the federal capitalization grant for the Clean Water State/EPA Revolving Loan Fund (CWSRF). Planning projects are not funded in order of their priority, but rather at a rate necessary to bring sufficient projects to the implementation phase to use all of the anticipated grant and loan funds each year.
3. The Clean and Clear Initiative calls for the accelerated funding of Phosphorus Removal Projects at wastewater treatment plants which are identified as requiring reduced phosphorus discharge limits in the Lake Champlain Phosphorus TMDL Report. Funds have been provided for this purpose in the 2005 through 2010 Capital Bills.
4. Appearance of projects on the Project Priority List indicates eligibility for funding assuming all other requirements are met. The dollar amounts may change from those listed as project cost change.
5. The Discharge Permits for all municipal wastewater facilities were reviewed for requirements which might result in infrastructure projects over the next five years, and these were included on the appropriate year Planning List.

PRELIMINARY AND FINAL DESIGN ENGINEERING PLANNING LIST ABBREVIATIONS AND NOTATIONS

The lists use abbreviations to identify project types. These abbreviations are listed, defined and described below.

“**CSO**” stands for **combined sewer overflow** abatement projects. Combined sewers carry both wastewater and stormwater and become hydraulically overloaded during rainfall events. This results in overflows to surface waters that are in violation of state and federal standards.

“**DWF**” represents **dry weather flow** projects. These are projects which abate pollution that occurs during dry weather periods, when systems are not stressed by rainfall events (see CSO discussion). Examples are the construction of a collection system and new treatment facility to eliminate direct discharges to surface waters, or the extension of a sewerage system to collect the flows from failing septic tank or leach field systems and convey them to an existing treatment facility.

“**ENL**” stands for **enlargement** of current facilities to handle increased wastewater flows resulting from municipal growth. These projects receive relatively low priority.

“**NPS**” stands for **non point source**.

“**OTHER**” stands for **other**, and represents projects that do not neatly fit into the primary categories.

“**OTHER -G**” stands for **other-green** projects. These projects may include energy efficiency, water efficiency, use of green infrastructure to infiltrate water, or other innovative projects.

“**PHOS**” stands for **phosphorus** removal projects. State statute prohibits most discharges to the drainage basins of Lake Champlain and Lake Memphremagog that contain a phosphorus concentration in excess of 0.8 milligrams per liter on a monthly-average basis, and requires that phosphorus effluent limits be implemented in any drainage basin where needed to meet the requirements of a total maximum load document or attain compliance with water quality standards.

“**REFURB**” stands for **refurbishment**. When a facility’s NPDES permit is renewed for the five year period within which its twentieth year of operation falls, the permit includes a requirement to perform an evaluation of the facility to identify the improvements and renovations that are necessary to enable the facility to continue to operate efficiently and meet its discharge standards for another twenty to twenty-five year design period.

“**SEWEX**” stands for **sewer extensions**.

“**SEWREP**” stands for **sewer line replacement**.

“**STRMW**” stands for **stormwater**.
