

## State of Vermont

### **Agency of Natural Resources Department of Environmental Conservation**

October 30, 2006

#### **Municipal Pollution Control Projects Priority List for State FY 2007 and Clean Water Intended Use Plan for Federal FY 2006**

#### **Municipalities and Interested Parties:**

On, August 21, 2006, the Department published notice of the availability of the Draft Municipal Pollution Control Projects Priority List for state fiscal year 2007 and the Draft Clean Water Intended Use Plan for federal fiscal year 2006 for review and comment, and of the public hearing held on September 26, 2006. Municipalities and other interested parties were mailed notice of the List and Plan under a cover letter dated August 21, 2006. A Public Responsiveness Summary has been prepared to address the oral and written comments received by the Department at the public hearing and through the comment period. The Public Responsiveness Summary is attached.

Pursuant to the authority provided in the State of Vermont Municipal Pollution Control Priority System, the Department of Environmental Conservation has adopted the priority list as it appears on the following sheets. The *FY 2007 Pollution Control Projects Priority List* indicates those projects the Department anticipates will be receiving state and/or federal funding through the end of state fiscal year 2007 and until the FY 2008 list is adopted. The 2006 Clean Water Intended Use Plan, which sets forth how the federal fiscal year 2006 Clean Water Capitalization Grant for the Clean Water State Revolving Fund (CWSRF) will be used, is attached to the Priority List, as are the Department lists of projects anticipated to be funded during fiscal years 2008 through 2011. These listings present those projects potentially fundable from grant programs or the revolving loan program over the next five state fiscal years, and are based on anticipated federal and state appropriations.

If you have any questions or desire clarification of any of the content of these documents, please contact Donald Robisky (802-241-3734) at the Facilities Engineering Division.

Sincerely,  
Jeffrey Wennberg, Commissioner  
Department of Environmental Conservation

**VERMONT AGENCY OF NATURAL RESOURCES  
DEPARTMENT OF ENVIRONMENTAL CONSERVATION**

State FY 2006 Municipal Pollution Control Project Priority List  
and Federal FY 2006 Clean Water Intended Use Plan

**General Information**

1. Project priority points awarded in accordance with the Department's Municipal Pollution Control Priority System are listed in the far-right column of the FY 2006 Pollution Control Project Priority List. The points have no significance for the phased-grant projects as the language in the 2003 Capital Bill effectively grants these projects equal elevated priority for 2004 or 2005 funds - whichever year they go to construction, and for subsequent years to complete the grants for which they are eligible.
2. Priority points on the Planning List or 'P-List' for future years do indicate the priority in which construction projects will be funded. Whether all construction projects ready to proceed in a particular year will be funded depends on the amount of funds allocated to the program by the Vermont legislature and the through the federal capitalization grant for the Clean Water State/EPA Revolving Loan Fund (CWSRF). Planning projects are not funded in order of their priority, but rather at a rate necessary to bring sufficient projects to the implementation phase to use all of the anticipated grant and loan funds each year.
3. The Clean and Clear Initiative calls for the accelerated funding of Phosphorus Removal Projects at wastewater treatment plants which are identified as requiring reduced phosphorus discharge limits in the Lake Champlain Phosphorus TMDL Report. Funds have been provided for this purpose in the 2005 through 2007 Capital Bills.
4. Appearance of projects on the Project Priority List indicates eligibility for funding assuming all other requirements are met. The dollar amounts may change from those listed as project cost changes affect the pro-rating of available grant amounts.
5. In August 2004 all municipalities with wastewater facilities were surveyed as to their anticipated need for funding of infrastructure projects over the next five years. Subsequently, adjustments have been made to reflect the actual progress of projects.
6. The Discharge Permits for all municipal wastewater facilities were reviewed for requirements which might result in infrastructure projects over the next five years, and these were included on the appropriate year Project List.

**FY 2007 Pollution Control Construction Projects Planning List**

Type / Municipality / Description	Estimated Project Cost	State Grant		Reclaimed Planning	SRF Loan	Points
Dry Weather Flow Pollution Abatement:						
Pownal - Contracts 3 & 4	4,800,000	<b>80,930</b>	<b>1</b>			53.41
Rochester - New Leachfield - Partial Grant	1,990,519	<b>60,700</b>	<b>1</b>		-64,260	15.12
Phosphorus Removal:						
Hardwick LC TMDL; Clean and Clear	750,000	<b>750,000</b>	<b>3</b>		-150,000	22.42
Ludlow - Partial Grant	1,010,600	<b>60,700</b>	<b>1</b>			21.99
Milton - Partial Grant	9,700,000	<b>701,380</b>	<b>1</b>			22.14
Richmond - Partial Grant	3,900,000	<b>107,910</b>	<b>2</b>			21.65
Springfield - Partial Grant	9,700,000	<b>202,320</b>	<b>1</b>			23.23
Waterbury LC TMDL; Clean and Clear	500,000	<b>500,000</b>	<b>3</b>		-35,000	22.96
Sewer Extension:						
Brattleboro; Mountain View MHP	3,300,000				3,000,000	5.94
Morristown; Hearthstone Sewer	100,000				89,500	4.77
Combined Sewer Overflow Abatement:						
St. Johnsbury - Phase A&B - Partial Grant	2,500,000	<b>40,470</b>	<b>1</b>			10.26
St. Johnsbury - Phase B2	230,000				170,000	10.26
Springfield - Phase 2, Contract 1- Partial Grant	2,800,000	<b>20,240</b>	<b>1</b>			20.70
Springfield - Phase 2, Contract 3	2,800,000				2,100,000	20.70
Other:						
Burlington Digester Rehab - Partial Grant	3,300,000	<b>175,350</b>	<b>1</b>			12.03
Colchester - On-Site Septic System Loans	150,000				150,000	4.25
Johnson - Route 15 Siphon Replacement	85,000				85,000	4.60

Note: Above entries may change as adjustments are made to project costs and eligibility determinations.

1: These are the projects appearing on the "Wastewater Project Phase-In List from the Capital Bill Conference Committee; 2003 Legislative Session".

2: The grant increase needed for this project was not subject to the 'split funding', but the municipality has agreed to delay a portion of its needed grant increase to afford optimum project implementation of those that were affected.

3: The grant monies for these projects were identified in the Capital Bill for Clean and Clear Phosphorus Removal projects.

Note 1: Planning projects may be added or deleted from the list, or funding shifted between EPA and SRF, and funding years.

Note 2: Priority Points assigned to projects during early planning are subject to significant change.

## PLANNING LIST ABBREVIATIONS AND NOTATIONS

The Planning Projects List uses abbreviations to identify project types. These abbreviations are listed, defined and described below.

**“REF”** stands for **refurbishment**. When a facility’s NPDES permit is renewed for the five year period within which its twentieth year of operation falls, the permit includes a requirement to perform an evaluation of the facility to identify the improvements and renovations that are necessary to enable the facility to continue to operate efficiently and meet its discharge standards for another twenty to twenty-five year design period.

**“CSO”** stands for **combined sewer overflow** abatement projects. Combined sewers carry both wastewater and stormwater and become hydraulically overloaded during rainfall events. This results in overflows to surface waters that are in violation of state and federal standards.

**“PHOS”** stands for **phosphorus** removal projects. State statute prohibits most discharges to the drainage basins of Lake Champlain and Lake Memphremagog that contain a phosphorus concentration in excess of 0.8 milligrams per liter on a monthly-average basis, and requires that phosphorus effluent limits be implemented in any drainage basin where needed to meet the requirements of a total maximum load document or attain compliance with water quality standards.

**“DWF”** represents **dry weather flow** projects. These are projects which abate pollution that occurs during dry weather periods, when systems are not stressed by rainfall events (see CSO discussion). Examples are the construction of a collection system and new treatment facility to eliminate direct discharges to surface waters, or the extension of a sewerage system to collect the flows from failing septic tank or leach field systems and convey them to an existing treatment facility.

**“ENL”** stands for **enlargement** of current facilities to handle increased wastewater flows resulting from municipal growth. These projects receive relatively low priority.

**“OTH”** stands for **other**, and represents projects that do not neatly fit into the primary categories.

**VERMONT AGENCY OF NATURAL RESOURCES  
DEPARTMENT OF ENVIRONMENTAL CONSERVATION**

State FY 2007 Municipal Pollution Control Project Priority List  
and Federal FY 2006 Clean Water Intended Use Plan

**Hearing and Public Responsiveness Summary**

**Hearing**

A public hearing to receive comment on the state *FY 2007 Municipal Pollution Control Projects Priority List* and the federal *FY 2006 Clean Water Intended Use Plan* prior to adoption was convened at approximately 2:00 pm on Tuesday September 26, 2006. The hearing was held in the Skylight Conference Room at the state office complex in Waterbury, Vermont. Notice of the meeting was sent to those municipalities, organizations, and individuals appearing on the mailing list maintained for this purpose, and was published in the Rutland Herald and the Barre Montpelier Times Argus, and the Burlington Free Press during the week of August 21. Donald Robisky of the Facilities Engineering Division moderated the meeting. Five people attended the hearing.

It was noted that the hearing was being taped to assist in the preparation of the responsiveness summary, and that any verbal or written comments received through October 10th would be considered in the preparation of the final documents.

**Comments and Responses**

At the hearing there was no comment on the List or Plan themselves. There were questions and discussion concerning the future of the water pollution control financing programs at the federal and state level.

During the comment period three municipalities requested that new projects be added to the List, and one consulting engineer submitted new projects and revisions to existing projects for inclusion on the List. All have been added/ revised as requested.

**VERMONT**  
**CLEAN WATER INTENDED USE PLAN**  
**FEDERAL FISCAL YEAR 2006**

A. Introduction

Vermont has agreed to submit to the U.S. Environmental Protection Agency, as part of its annual application for a Clean Water Capitalization Grant under Title VI of the Water Quality Act of 1987, (the Act), a Clean Water Intended Use Plan (CWIUP) which meets requirements of Section 606(c) of the Act and the Clean Water Capitalization Grant Agreement. The CWIUP serves as the planning document to explain how each fiscal year's appropriation for the Clean Water State Revolving Fund (CWSRF) will be used.

B. Short Term Goals and Objectives

Vermont holds the following short term goals and objectives for use of the CWSRF.

- (1) To coordinate NPDES permit schedules with anticipated award of CWSRF loans such that projects are brought into preliminary and final planning in time to assure their readiness to proceed to construction when capitalization grant funds become available.
- (2) To develop any rules, guidance or procedures necessary to implement the Vermont - EPA pollution control revolving fund.
- (3) To provide local government with low cost financial assistance.
- (4) To coordinate state funded programs for wastewater treatment facilities with activities of the CWSRF.
- (5) To provide effective program management to insure integrity of the CWSRF.

### C. Long Term Goals and Objectives

The primary long term goal of the CWSRF is to provide financial assistance to Vermont municipalities to fund the completion of all known enforceable requirements of the Act.

The second long term goal of the CWSRF is to insure the fund operates in perpetuity to provide continuing financial assistance to Vermont municipalities for future pollution control needs to include new wastewater treatment facility construction, existing facility enlargement or refurbishment, sewer extensions, combined sewer overflow abatement, sludge and septage treatment and disposal, stormwater management facilities, advanced waste treatment determined necessary to meet water quality standards, and other projects deemed necessary for pollution control.

Combined sewer overflow abatement projects presently receive a CWSRF loan in the amount of 50% of the total eligible project cost, and a 25% construction grant from state funds. The remaining 25% of project funds comes from local bond issues. Certain sludge and septage treatment and disposal projects presently qualify for a mix of 50% CWSRF loan and 50% state grant on eligible project cost. If, in the future, sufficient state capital funds cannot be secured to provide the grants, it may become necessary to fund CSO and sludge and septage projects with a loan on the total project in order to assure the most beneficial use of the federal loan funds.

Other eligible projects will receive CWSRF loans on 100% of eligible project cost. Such eligible projects include: sewer extensions, facility enlargement and refurbishment, and sludge and septage treatment improvements and disposal that do not qualify for state grant funding. State grants may still be awarded to projects that insure other public benefit by using federal matching funds which would otherwise be lost to the state's overall pollution control program.

Although the CWSRF may be used for the refinancing of local debt obligations incurred after March 7, 1985, Vermont does not intend to use the fund in this way until all necessary pollution control projects have been constructed, unless there is compelling public benefit to be secured. The interest rate on CWSRF loans issued to refinance debt has been set at eighty percent of the average rate on marketable obligations of the state. All other CWSRF loans are currently issued at zero percent interest. An administrative fee of up to two percent on construction loans took effect on July 1, 1999. The fee is charged for all new construction loans, with the exception of CSO projects and those projects which the state has made a previous commitment to fund with no interest or fee. Fee proceeds will be deposited into a dedicated account separate from the CWSRF account, referred to as the administrative account. In the future, if funds held in the administrative account are in excess of that necessary to fund the state's administration of the CWSRF program, some of those funds may be transferred to the CWSRF account for project funding.

D. CWSRF Capitalization Grants for Federal Fiscal Year 2006 and Future Years

The federal fiscal year 2006 capitalization grant allotment available to Vermont is \$4,242,300, as authorized by Title VI of the Clean Water Act. We will apply for the grant on a schedule as determined appropriate following the SFY 2007 Priority List Hearing. For planning purposes, we are projecting future capitalization grants at \$5 million. Pollution Control Project Planning Lists (P-list) show anticipated construction and planning projects for the immediate five-year period inclusive of state fiscal year 2007.

E. Criteria and Methods for Distribution of Funds

The Vermont CWSRF initiated operations in FY89 and all initial financial assistance activities of the CWSRF have been in the form of loans. Loans will continue to be made in accordance with a project's priority list ranking (noted on the Priority List) established annually through the Municipal Pollution Control Priority System.

The Vermont General Assembly enacted Act 75 creating 24 V.S.A. Chapter 120 in the 1987 session, which act established Vermont's Clean Water Revolving Fund and set out certain priority criteria for the purpose of ranking prospective projects. The Municipal Pollution Control Priority System incorporates those criteria in addition to criteria required in federal construction grant regulations 40 CFR Section 35.915.

F. Re-allocated or Additional Federal Economic Stimulus Funds

In the event funds are re-allocated from the DWSRF to the CWSRF or additional federal funds are made available beyond the anticipated amount, Vermont will advance these funds to the appropriate projects in accordance with this Intended Use Plan, the Municipal Pollution Control Priority System, and any specific requirements of the re-allocated funds.

G. Public Participation

Vermont implements public participation procedures described in 40 CFR Part 25 during development of the annual Pollution Control Priority List (PPL) and CWIUP. The CWIUP is developed and adopted annually along with the PPL using the same public participation procedure employed for adoption of the PPL. That procedure is outlined in the *Municipal Pollution Control Priority System*.

Vermont implements public participation relating to project-specific environmental review for CWSRF funded projects in accordance with the department's *Environmental Review Procedures For Projects Funded Through the Vermont/EPA Revolving Loan Program*. This procedure was approved by the EPA Regional Administrator in accordance with the August 2, 1989 CWSRF Operating Agreement between the State of Vermont and the U.S. Environmental Protection Agency, Region I.

#### H. Annual Report

In accordance with the requirements of Section 606(d) of the Act, Vermont will provide EPA with an Annual Report, which will be submitted to EPA within 90 days of the end of the state fiscal year. The Annual Report will contain information on how the state has met the goals and objectives of the previous fiscal year as stated in the IUP and grant agreement. The Annual Report will describe how well the existing SRF financial operating policies, alone or in combination with other state financial assistance programs, will provide for the long term fiscal health of the fund, assist communities to increase local responsibility for compliance, and carry out other provisions specified in the State Clean Water Strategy. The Annual Report will also provide information on loan recipients, loan awards/disbursements, and environmental assessment determinations.

The Annual Report will also establish that the State has:

- (1) Reviewed all CWSRF funded section 212 projects in accordance with the approved environmental review procedures (section 602(a));
- (2) Deposited its match on or before the date on which each quarterly grant payment was made (section 602(b)(2));
- (3) Made binding commitments to provide assistance equal to 120 percent of the amount of each grant payment within one year after receiving the grant payment (section 602(b)(3)); and
- (4) Expended all funds in an expeditious and timely manner (section 206(b)(4)).

#### I. Environmental Benefits Reporting

A Clean Water State Revolving Fund Environmental Benefits Assessment Form will be completed each time a loan is transacted during the fiscal year. A compilation of all Environmental Benefits Assessment Forms completed during the fiscal year will be included in the Annual Report.

J. Project Funding

Projects/Activities Anticipated to Receive Federal FY2006 CWSRF Funds\*  
 (Award of FFY2006 Funds are anticipated to be made during SFY07)
