

State of Vermont
PERMIT AND LICENSE INFORMATION

STORMWATER PERMITS FOR NEW DEVELOPMENT & REDEVELOPMENT

**SUMMARY
 DESCRIPTION
 OF PERMIT**

Coverage under **General Permit 3-9015** is required for the following new stormwater discharges to all Waters of the State of Vermont that are not principally impaired by stormwater runoff including:

- Discharges of stormwater runoff from new development in which the area of all impervious surfaces generating regulated stormwater runoff is equal to or greater than 1 acre;
- Discharges of stormwater runoff from the expansion of existing impervious surfaces by 5,000 square feet, at an existing development, if total resulting impervious surface is greater than 1 acre;
- Discharges of stormwater runoff from the redevelopment of existing impervious surfaces at an existing development, if the redevelopment involves impervious surfaces that meet the threshold for a permit in above;
- The jurisdictional threshold for stormwater discharge permits are established in the Stormwater Management Rule (Ch. 18), and have changed since General Permit 3-9015 was issued. Projects that did not require permit coverage under GP 3-9015 prior to the change in thresholds established by the Stormwater Management Rule may still obtain coverage under GP 3-9015;
- Projects that do not qualify for coverage under GP 3-9015 may be required to obtain an Individual Stormwater Discharge Permit;
- Exemptions from the need to obtain coverage under a stormwater discharge permit are described in section 18-304 of the Stormwater Management Rule.

**EXAMPLE OF
 REGULATED
 ACTIVITY**

Stormwater runoff from a development which creates more than 1 acre of impervious surfaces, or expansions to existing projects. Impervious surfaces including roofs, driveways, parking lots, and new roads, whether paved or gravel surfaces. This can include a residential subdivision. The Stormwater Rule reduced this threshold to one acre, effective July 4, 2005. Expansions of 5,000-square feet such that the total resulting impervious surface (including new & existing) is 1 acre or more may require permit coverage.

**INFORMATION
 REQUIRED**

The following information is available through the Stormwater Section WEB SITE: http://www.anr.state.vt.us/dec/waterq/stormwater/htm/sw_3-9015.htm at Stormwater Permit Applications, Forms and Fees

- General Permit for Stormwater Discharges from New Development and Redevelopment
- Notice of Intent (NOI) Form

Schedule A Form

Stormwater Application Worksheets and all required supplemental information.

FEES

Administrative Processing Fee All applications; for new permits, amendments, renewals, and permit transfer requests.

- \$100.00 per request

Application Review Fee Applications for an individual discharge permit, or for authorization to discharge under a general permit.

- Class A Waters: \$1170.00 per acre of impervious surface; min. \$1170.
- Class B Waters: \$360.00 per acre of impervious surface; minimum \$180.

Annual Operating Fee All projects permitted under an individual permit, or an authorization to discharge under a general permit.

- Class A Waters: \$255.00 per acre of impervious surface; minimum \$235
- Class B Waters: \$66.00 per acre of impervious surface; minimum \$60.00

APPLICATION TIME FRAME

The performance standard for processing a complete application for a general permit is 40 days, and for an individual permit is 90 days.
