

## VERMONT RESIDUALS MANAGEMENT QUARTERLY REPORT - PART B

### INSTRUCTIONS - PART B: WASTES RECEIVED FROM OTHER WASTE MANAGERS

Complete **Part B** only if you **received** wastes from **other permitted** waste managers or if you accepted septage from a hauler during the quarter. Examples include, but are not limited to, the following cases:

- Wastewater treatment plant receivals of septage from septic services.
- Wastewater treatment plant receivals of sewage treatment biosolids from other treatment plants.
- Septic service that operates a certified land application program or storage facility and:
  - receives septage from other septic services,
  - receives sewage treatment biosolids from municipal treatment plants,
  - receives any regulated waste from another permitted facility
- Regional residual waste processing facility receivals of sewage treatment biosolids from one or more treatment plants, or septage from septic services.
- Residual waste transporter receivals of residual wastes from another permitted facility.
- Residual waste broker receivals of regulated residual wastes.

Enter the Permittee's name, the reporting period, and SOLID WASTE I.D. NUMBER (if applicable).

**Wastes Received from Other Waste Managers:** Use this section to report amounts and sources of wastes received from other waste managers, as follows:

Enter the **months** of the quarter, in the three columns.

Enter the name of the waste generator and the type of waste. For **all wastes** use a **separate line** for each **different combination of individual sources and waste types.**

Enter the amounts of waste and units of volume or weight (gallons, cubic yards, wet tons, dry tons, etc.)
