

Geology and Mineral Resources Division 241-3608/Fax 241-4585
103 South Main Street, The Logue Cottage, Waterbury VT 05671-2420

This Division, also known as the Vermont Geological Survey, conducts research and surveys related to the geology, mineral and groundwater resources, natural hazards, and topography of Vermont. The Division also provides information to the public, government, industry, and other organizations who request assistance; reviews projects as they relate to Criteria 9D and 9E of Act 250; and maintains and publishes Vermont geological information. Included in this Division is the Radioactive Waste Management Program, which meets Vermont's responsibilities in the Texas Low-Level Radioactive Waste Disposal Compact.

State Geologist, Laurence Becker -- 241-3496
Environmental Scientist, Geologist, Marjorie Gale -- 241-3608
Environmental Scientist, Geologist, Jonathan Kim -- 241-3469
