

Fish Hatcheries 241-3702/Fax 241-3295
103 South Main Street, 10 South, Waterbury VT 05601-0501

State fish culture stations (hatcheries) raise fish to mitigate the impacts of environmental degradation on the spawning and survival of fish populations to: rehabilitate fish populations; re-establish fish populations that have severely declined because of social or environmental pressures; expand the range of desirable fish populations where suitable habitat exists but is limited by spawning habitat, access or some other factor; and to provide public recreational angling. The state fish pathology lab is located in Waterbury, where routine diagnostic and survey work on fish pathogens is conducted.
